SUBJECT INDEX

VOLUME 7 (1969)

Actinomycin D, inhibition of chromosomal repair in human lymphocytes, 126
Aged and non-aged spermatozoa, of *D. melanogaster*, spontaneous sex-linked recessive lethal frequencies, 417
Ageing, in *Triticum durum* seeds, embryo and endosperm response as revealed by chromosomal damage in the root meristem, 349
Agrobacterium tumefaciens, suspected mutant with altered DNA, 466
Anoxia, modification of X-ray-induced chromosome changes in different oocyte stages of *D. melanogaster*, 225
Antimutagens, effects, 463
Arabidopsis thaliana, genetic activity of thymidine-base analogue, 51
—, mutations induced by isomeric forms of L-threitol-1,4-bismethanesulfonate, 241
Aspergillus nidulans, mitotic recombination and mutation, 155
—, reversion of non-nitrate utilizing *(nia D)* mutants, 163
—, UV-sensitive mutants increasing mitotic crossing-over, 485

Bacillus subtilis, auxotrophic preemption of a specific growth requirement, 287
—, UV-sensitive mutants, 133
Bacillus subtilis 168, mutants with altered DNA-base composition, 13
Bacterium paracoli, mutants with altered DNA-base composition, 13
Barbiturates, effect on a desynaptic mutant of ryegrass, 205
Barley, root-tips, induction of chromosomal aberrations with isomeric forms of L-threitol-1,4-bismethanesulfonate, 241
Base analogues, post-irradiation treatment in silkworm, 479
Benzodiazepine tranquillizers, in chinese hamsters, chromosome studies on bone marrow, 99
Biosynthesis, of secondary metabolites, regulation, 19
5-Bromodeoxyuridine, in *Arabidopsis thaliana*, 51

Caffeine, possible mutagen, 475
Caffeine resistance, of mutants of *E. coli*, occurrence of suppressors, 273
Carcinogen, 4-nitroquinoline-1-oxide, production of respiration-deficient mutants in *S. cerevisiae*, 333
Chemosterilants, comparative effects on spermatogenic stages in the house fly, 63
Chlamydomonas reinhardi, effect of selective medium on manifestation of mutations induced with mono-alkylating agents, 25
Chlordiazepoxide, absence of effects on the chromosomes of diploid human fibroblast cells, 109
Chlordiazepoxide hydrochloride, in chinese hamsters, 99
Chromosomal abnormalities, in cultured human leucocytes, phleomycin-induced, 251
Chromosomal damage, in the root meristem of *Triticum durum* seeds, embryo and endosperm response to ageing, 349
Chromosomal repair, in human lymphocytes inhibited by actinomycin D, 126
Chromosome(s), of diploid human fibroblast cels, absence of effects of chlordiazepoxide and diazepam, 109
—, human, influence of L-cysteine on the effect of myleran, 254
Chromosome aberrations, bone marrow studies from chinese hamsters treated with benzodiazepine tranquillizers and cyclophosphamide, 99
—, induced by isomeric forms of L-threitol-1,4-bismethanesulfonate in barley and onion root-tips, 241
—, induced by X-irradiation in human lymphocytes, 453
—, spontaneous, in relation to seed dormancy in *Triticum durum*, 199
—, in *V. faba*, produced by 1,3-propanesultone, 339
Chromosome breaks, X-ray-induced radiosensitivity and repair time, 441
Chromosome changes, X-ray-induced, modification with anoxia in different stages of *D. melanogaster*, 225
X-Chromosome loss, dose-dependence, in mature oocytes of *D. melanogaster*, induced by X-rays, 471
Coliphage T2, inactivation and mutation by *N*-methyl- and *N*-ethyl-*N*-nitrosourea, 1
Cyclophosphamide, in chinese hamsters, chromosome studies on bone marrow, 99
L-Cysteine, influence on the effect of myleran on human chromosomes, 254

Daunomycin, sensitivity of G_1 phase of the mitotic cycle to chromosome aberrations, 91

Desynaptic mutant, of ryegrass, effect of temperature and barbiturates, 205
Diazepam, absence of effects on the chromosomes of diploid human fibroblast cells, 109
—, in chinese hamsters, 99
Diepoxybutane, at the *ad-3A* and inositol loci in *N. crassa*, 141
DNA, altered, suspected mutant of *Agrobacterium tumefaciens*, 466
DNA, transforming, inactivation by UV irradiation, 133
DNA-base composition, altered, from mutants, 13
Dose–response curves, in *N. crassa*, effect of genetic background, 297
Drosophila melanogaster, different oocyte stages, modification of X-ray-induced chromosome changes with anoxia, 225
—, effects of oxygen and nitrogen post-treatments on mortality of eggs irradiated as stage-7 oocytes, 357
—, — — — on survival of irradiated stage-14 oocytes, 369
—, heterologous interchange at meiosis, disjunctional consequences, 393
—, mature oocytes, dose-dependence of X-chromosome loss induced by X-rays, 471
—, parameters of spontaneous and X-ray induced reversion of the *white-ivory* mutant, 409
—, possible origin of ethyl methanesulfonate induced phenotypically complete *dumpy* mutants, 487
—, sensitivity differences between stage-7 and stage-14 oocytes, 369
—, spontaneous sex-linked recessive lethal frequencies from aged and non-aged spermatozoa, 417
—, X-ray-induced multiple aberrations among oocytes, 122
—, — recessive lethals in newly inseminated eggs, 385

Escherichia coli K12, occurrence of suppressors in caffeine-resistant mutants, 273
Ethyleneimine, in silkworm spermatozoa, changes in mutational response, 425
Ethyl methanesulphonate, at the *ad-3A* and inositol loci in *N. crassa*, 141
—, mutagenic action in *Chlamydomonas reinhardi*, 25
—, in *Phaseolus vulgaris*, seed-coat color changes, 469
—, phenotypically complete *dumpy* mutants in *D. melanogaster*, possible origin, 487
—, in silkworm spermatozoa, changes in mutational response, 425
N-Ethyl-*N*-nitrosourea, inactivation and mutation of coliphage T2, 1

Fibroblasts, human fetal, diploid cultures, treated with chlordiazepoxide and diazepam, 109
5-Fluorodeoxyuridine, in *Arabidopsis thaliana*, 51

Ginkgo cells, grown *in vitro*, photoreactivation of UV light-induced pyrimidine dimers, 120
Growth requirement, auxotrophic preemption in *B. subtilis*, 287
G_1 phase, sensitivity, of the mitotic cycle to chromosome aberrations induced by daunomycin, 91

Habrobracon sperm, induction of mutations with mitomycin C, 231
Haemophilus influenzae, photoenzymatic repair of UV lesions in DNA, 261
Heterokaryon, of *N. crassa*, analysis of *ad-3* mutants induced by nitrous acid, 307
Host-mediated assay, for mutagenicity, role of selection, 117

Interchange, heterologous, at meiosis in *D. melanogaster*, disjunctional consequences, 393
Irradiation, fast neutron, induction of translocations in mouse spermatogonia, 235
—, γ, induction of variants in *Streptomyces aureofaciens*, 19
—, ionizing, in silkworm, effect of post-irradiation with base analogues, 479
—, UV, at the *ad-3A* and inositol loci in *N. crassa*, 141
—, —, cytoplasmic and nuclear events in strains of *S. cerevisiae* with different UV sensitivities, 171
—, —, inactivation of transforming DNA, UV-sensitive mutants of *B. subtilis*, 133
—, —, induction of variants in *Streptomyces aureofaciens*, 19
—, —, mutations in *S. cerevisiae*, 315
—, —, pyrimidine dimers in Ginkgo cells grown *in vitro*, photoreactivation, 120
—, —, of transforming DNA of *Haemophilus influenzae*, photoenzymatic repair, 261
—, X, chromosome aberrations induced in human lymphocytes, 453
—, —, chromosome breaks, radiosensitivity and repair time, 441
—, —, chromosome changes with anoxia in different oocyte stages of *D. melanogaster*, 225
—, —, in *D. melanogaster* eggs as stage-7 oocytes, effects of oxygen and nitrogen post-treatment on mortality, 357
—, —, in *D. melanogaster* stage-14 oocytes, effects of oxygen and nitrogen post-treatment on survival, 369
—, —, dose-dependence of X-chromosome loss in mature oocytes of *D. melanogaster*, 471
—, —, genetic effect on seeds of *Zea mays*, 35
—, —, induction of variants in *Streptomyces aureofaciens*, 19
—, —, multiple aberrations among oocytes of *D. melanogaster*, 122
—, —, mutations in the poeciliid fish, *Lebistes reticulatus* Peters, 75
—, —, parameters of reversion of the *white-ivory* mutant of *D. melanogaster*, 409

Irradiation, X, (*continued*)
—, —, paternal, in swine, sex proportion, 482
—, —, recessive lethals in newly inseminated eggs of *D. melanogaster*, 385

Karyotype, of a cultured chinese hamster cell line defective for UV light resistance, 129

Lebistes reticulatus Peters, X-ray-induced mutations, 75
Leucocytes, cultured, human, phleomycin-induced mitotic inhibition and chromosomal abnormalities, 251
—, —, —, exposed to daunomycin, 91
Lymphocytes, human, chromosome aberrations induced by X-irradiation, 453
—, —, inhibition of chromosomal repair by actinomycin D, 126
—, peripheral, from a human heterozygous for a ring chromosome, cultured in presence and absence of tritiated thymidine, 433

Mapping, and functional analysis of *y* and *CII* mutants, 257
Medazepam, in chinese hamsters, 99
Methyl ethanesulfonate, mutagenic action in *Chlamydomonas reinhardi*, 25
Methyl methanesulfonate, mutagenic action in *Chlamydomonas reinhardi*, 25
1-Methyl-3-nitro-1-nitrosoguanidine, effect of treatment conditions on radiomimetic activity in plants, 43
N-Methyl-*N*-nitrosourea, inactivation and mutation of coliphage T2, 1
Mitomycin C, induction of mutations in habrobracon sperm, 231
—, in silkworm spermatozoa, changes in mutational response, 425
Musca domestica L., comparative effects of chemosterilants on spermatogenic stages, 63
Mutagen, 5-bromodeoxyuridine, in *Arabidopsis thaliana*, 51
—, caffeine, 475
—, chemical, induction of variants in *Streptomyces aureofaciens*, 19
—, chlordiazepoxide hydrochloride, in chinese hamsters, 99
—, cyclophosphamide, in chinese hamsters, 99
—, daunomycin in human leukocytes, 91
—, diazepam, in chinese hamsters, 99
—, diepoxybutane, in *N. crassa* 141
—, ethyleneimine, in silkworm spermatozoa, 425
—, ethyl methanesulfonate, in *Chlamydomonas reinhardi*, 25
—, —, in *N. crassa*, 141
—, —, in *Phaseolus vulgaris*, 469
—, —, in silkworm spermatozoa, 425
—, *N*-ethyl-*N*-nitrosourea in coliphage T2, 1
—, 5-fluorodeoxyuridine, in *Arabidopsis thaliana*, 51
—, —, in human fibroblast cells, 109
—, medazepam, in chinese hamsters, 99
—, methyl ethanesulfonate in *Chlamydomonas reinhardi*, 25
Mutagen, (*continued*)
—, methyl methanesulfonate in *Chlamydomonas reinhardi*, 25
—, 1-methyl-3-nitro-1-nitrosoguanidine, in plants, 43
—, *N*-methyl-*N*-nitrosourea in coliphage T2, 1
—, mitomycin C, in habrobracon sperm, 231
—, —, in silkworm spermatozoa, 425
—, phleomycin, in human leucocytes, 251
—, 1,3-propanesultone, in *V. faba*, 339
—, L-threitol-1,4-bismethanesulfonate, in *A. thaliana*, 241
—, triethylenemelamine, in silkworm spermatozoa, 425
Mutant, *CII*, mapping and functional analysis, 257
—, *y*, mapping and functional analysis, 257
Myleran, effect on human chromosomes, influence of L-cysteine, 254

Neurospora crassa, analysis of *ad-3* mutants induced by nitrous acid in a heterokaryon, 307
—, effect of genetic background on dose–response curves, 297
—, mutagen specificity at the *ad-3A* and inositol loci, 141
Nitrogen post-treatment, effect on mortality of *D. melanogaster* eggs irradiated as stage-7 oocytes, 357
—, effect on survival of *D. melanogaster* stage-14 oocytes, 369
4-Nitroquinoline 1-oxide, production of respiration-deficient mutants in *S. cerevisiae*, 333
Nitrous acid, in a heterokaryon of *N. crassa*, analysis of *ad-3* mutants, 307
Non-nitrate utilizing *(nia D)* mutants, reversion, of *A. nidulans*, 163

Onion, root-tips, induction of chromosomal aberrations with isomeric forms of L-threitol-1,4-bismethanesulfonate, 241
Oocytes, of *D. melanogaster*, X-ray-induced multiple aberrations, 122
Oxygen post-treatment, effect on mortality of *D. melanogaster* eggs irradiated as stage-7 oocytes, 357
—, effect on survival of *D. melanogaster* stage-14 oocytes, 369

pH, influence on the radiomimetic activity of 1-methyl-3-nitro-1-nitrosoguanidine in plants, 43
Phaseolus vulgaris I, seed-coat color changes induced by ethyl methanesulfonate, 469
Phenotype, of a cultured chinese hamster cell line defective for UV light resistance, 129
Phleomycin, mitotic inhibition and chromosomal abnormalities in cultured human leucocytes, 251
Photoenzymatic repair, of UV lesions in DNA of *Haemophilus influenzae*, effects at various temperatures, 261

Photoreactivation, of UV light-induced pyrimidine dimers in Ginkgo cells, 120
Poeciliid fish, *Lebistes reticulatus* Peters, X-ray-induced mutations, 75
Post-irradiation treatment, with base analogues in silkworm, 479
1,3-Propanesultone, production of chromosomal aberrations in *V. faba*, 339

Radiomimetic activity, of 1-methyl-3-nitro-1-nitrosoguanidine in plants, effect of treatment conditions, 43
Radiosensitivity, and repair time, of X-ray-induced chromosomal breaks, 441
Recombination, mitotic, and mutation in *A. nidulans*, 155
Repair time, and radiosensitivity, of X-ray-induced chromosomal breaks, 441
Respiration-deficient mutants, in *S. cerevisiae*, produced by a carcinogen, 333
Reversion, of non-nitrate utilizing (*nia D*) mutants of *A. nidulans*, 163
Ryegrass, effect of temperature and barbiturates on a desynaptic mutant, 205

Saccharomyces cerevisiae, cytoplasmic and nuclear genetic events induced by UV light, 171
—, induction of mutations by UV light, 315
—, production of respiration-deficient mutants by a carcinogen, 333
—, selection of nonsense suppressors, 187
Seed-coat color changes, induced by ethyl methanesulfonate in *Phaseolus vulgaris*, 469
Seed dormancy, in relation to spontaneous chromosome aberrations in *Triticum durum*, 199
Selection, of nonsense suppressors in *S. cerevisiae*, 187
—, role in host-mediated assay for mutagenicity, 117
Sensitivity, to UV-irradiation, mutants in *A. nidulans*, increasing mitotic crossing-over, 485
—, —, mutant of *S. typhimurium*, 248
—, —, in strains of *S. cerevisiae*, cytoplasmic and nuclear genetic events, 171
Sex proportion, in swine after paternal X-irradiation, 482
Silkworm, effect of post-irradiation treatment with base analogues, 479
Silkworm, (*continued*)
—, spermatozoa, exposed to mono- and polyfunctional alkylating agents following storage, changes in mutational response, 425
Sister-chromatid exchange, in a ring chromosome, effect of tritiated thymidine, 433
—, in *V. faba*, 215
Spermatozoa, aged and non-aged, of *D. melanogaster*, spontaneous sex-linked recessive lethal frequencies, 417
Streptomyces aureofaciens, induction of variants and specificity of mutagens, 19
S. typhimurium, isolation and some properties of the radiation-sensitive mutant, 248
Suppressors, nonsense, in *S. cerevisiae*, selection, 187
—, occurrence in caffeine-resistant mutants from *E. coli* K12, 273

Temperature, effect on a desynaptic mutant of ryegrass, 205
—, high, influence before X irradiation of *Zea mays* seeds on the "immediate" effect, 35
—, influence on the radiomimetic activity of 1-methyl-3-nitro-1-nitrosoguanidine in plants, 43
L-Threitol-1,4-bismethanesulfonate, isomeric forms, induction of chromosomal aberrations and mutations in barley and onion root-tips, 241
—, —, induction of mutations in *A. thaliana* 241
Thymidine, tritiated, effect on sister-chromatid exchange in a ring chromosome, 433
Translocations, in mouse spermatogonia, induced by fast neutron irradiation, 235
Triethylenemelamine, in silk-worm spermatozoa, changes in mutational response, 425
Triticum durum, embryo and endosperm response to ageing as revealed by chromosomal damage in the root meristem, 349
—, spontaneous chromosome aberrations in relation to seed dormancy, 199

Vicia faba, production of chromosomal aberrations by propanesultone, 339
—, sister-chromatid exchanges, 215

White-ivory mutant of *D. melanogaster*, parameters of spontaneous and X-ray-induced reversion, 409

Zea mays, seeds, genetic effect of X-irradiation, 35
